A classic kitchen will work beautifully in your home, whether it's small or large, city or country, period or modern. Handsome proportions, careful attention to detail and a hint of nostalgia all add to the timeless appeal of these style favourites. Built to last – and designed for lasting good looks, too.

Fitzroy

All the solid grace of a Shaker kitchen, beautifully restyled for the twenty-first century. Add your own touches with an eclectic selection of traditional handles, balanced with more contemporary features such as a herb garden, curved corners, or free-standing cabinetry in accent colours.

Milbourne

It's not hard to see why Milbourne is our most popular Shaker design. Its chunky frame, timeless styling and subtly textured finish bring a hint of tradition into this otherwise thoroughly modern kitchen. Create your own look by dressing Milbourne up or down with finishing touches and décor details.

Milbourne

The beauty of neutral tones – like this very on-trend Partridge Grey – is the opportunity to splash out with sensational accent colours. Vivid yellow is balanced here by dark worksurfaces and furniture. Handy deep drawers and modern open shelves still reflect Shaker simplicity, utility and honesty.

TOP TIPS FOR THE PERFECT FLOW

The kitchen triangle

The primary tasks in your kitchen are carried out between the hob, the sink and the fridge. The triangle that connects these three areas defines what kitchen experts call an 'efficient kitchen layout'. The triangle is the shortest, most effective way to tread between these three areas and should be considered in your new kitchen design.

Group similar functions

Consider grouping the functions of your kitchen and planning your storage accordingly. There's no point in placing a spice rack yards away from the hob. Specialist trays and inserts for our range of base units help you create highly-functional storage zones.

The perfect serve

Try to imagine where you're most likely to serve up your meals. This is a great place to store your cutlery, plates and bowls. Take advantage of our wide range of drawer inserts to make your life easier and your serves perfect.

Don't be afraid of heights

Many British homes enjoy high ceilings and utilising this extra space should be a priority in all kitchen schemes. Consider doors that open upwards or specify our clever iMove units which allow you to bring the contents of high cupboards down to eye level.

Designing a great kitchen is a complicated task with many things to take into consideration. Storage is often overlooked, but the inside of your cabinets is as important as your door and drawer fronts.

To make it easier for you to keep on top of sorting your waste, we've developed a range of easy to use, modular bins. They are all designed to fit within standard cabinet sizes and nest together to create multiple combinations. No matter how complex your local recycling policy is, we've got a solution to help.

How much do you recycle?

We offer a number of solutions whether you want a single unit for all your waste or multiple spaces to help you recycle.
